

## -Watercolor Snowflakes-

### Materials Needed: (Option 1)

- Watercolor paints
- Cup of water
- Paint brush
- White Crayon
- White cardstock

### Instructions:

1. Draw your snowflake with the white crayon on your white cardstock. Try to take up the entire sheet of paper.
2. Begin to use your watercolor paints over the entire area that you used. Make sure to dip the paint brush in the cup of water before you dip it in the paint (this helps your paint be more watercolor-like). The paint will not stick to where you drew your snowflake with the white crayon.
3. Let dry.
